HEALTHCARE BENEFITS ANALYTICS

Visual, Sharable Benefits Analytics

Cedar Gate Healthcare Benefits Analytics is an employee benefits analytics and reporting application for self-funded employers, their payers, and their broker/consultant advisory partners seeking to meet the plan sponsor's clinical and financial performance goals. It enables benefits managers to tailor plan parameters and model performance based on the characteristics of the member population. Visual dashboards distill the data into prescribed actions, preventing clients from getting lost in the analysis. Focused reports track the efficacy and impact of care management activities and point solutions by monitoring performance indicators in member cohorts. Unlike the competition, the Healthcare Benefits Analytics tool is built for self-service plan design and reporting, reducing or eliminating the need for additional consultants or vendors. It pulls data from a common data lake that is shared by Cedar Gate's Care Management application, ensuring the accurate translation of data to insights, and insights to action. The application is cloud-based and built on a next-generation NoSQL database for rapid interpretation of unstructured data. It enriches member data to identify savings recommendations and generates visual dashboards that communicate insights and key points to all stakeholders.

MEMBER DATA ENRICHMENT

Augment member data with over 5,000 types of data enrichment.

Turn raw data into actionable insights. Member data is automatically enriched with 115 clinical quality metrics, 40 chronic conditions, 1,100 benchmark values, social determinants, machine learning models, referenced-based pricing comparisons, inpatient and outpatient provider quality scores across 39 clinical categories, episode groupers, diagnosis and procedure groupers, utilization event groupings, pharmacy enrichments, avoidable ER and admits, and much more.

PLAN & BENEFITS MODELING

Test changes to plan elements based on the member population profile to generate recommendations that will have the greatest clinical and financial impact.

Design plans that will achieve health, cost, and utilization goals. Test what/if scenarios with predictive analytics to evaluate how edits to plan parameters, including deductibles, coinsurance, out-of-pocket maximums, and medical/pharmacy copays, will impact cost and utilization. Determine the optimal plan design with savings strategies.

PRE-CONFIGURED DASHBOARDS & REPORTS

Render stunning visuals with over 100 out-of-the-box clinical and financial reports and dashboards that communicate key facts to an array of stakeholders.

Eliminate the time, effort, and cost associated with report building and distribution. Create custom reports and dashboards that cater to the casual and power user, with the ability to dynamically drill down from any displayed metric, to the underlying claim and member level detail, to the source data table. Share key metrics through purpose-built Executive Analytics dashboards or choose from a library of pre-configured report parameters that can be exported in several file formats and set for automatic distribution.can be generated in several file formats and set for automatic distribution.

MEMBER, PLAN & BENEFITS BENCHMARKING

Compare real-time performance against Cedar Gate's proprietary commercial benchmark dataset of over 11 million members — by region, state, MSA and industry type.

Pursue performance goals based on reliable benchmarks. Gauge plan performance against 1,100 benchmark values embedded in reports and dashboards. Use the benchmarks, along with reference-based pricing comparison data, to establish performance goals and identify areas for potential improvement.

HEALTHCARE BENEFITS ANALYTICS MODULES

EXECUTIVE ANALYTICS
Streamlined, automatically distributed reports that highlight trends, comparisons, and recommended actions.

BENEFITS MODELING
Project performance based on potential plan design changes and the characteristics of the member population.

APPROPRIATE CARE MEASURES
Apply care guidelines to analyze clinical clinical metrics within the member population.

MEDICARE REFERENCE PRICING
Integrated Medicare pricing content supplied by CMS.

DATA ACCESS
Access data that resides in a separate data warehouse.

IMPLEMENTATION & TRAINING
Comprehensive application implementation and user training.

COMPLEMENTARY PRODUCTS

CARE MANAGEMENT
Clinically driven health management and improvement application.

HEALTH MANAGEMENT
Member health engagement portal featuring care plans, health assessments and member messaging.

Some modules and product available at an incremental charge.

CEDAR GATE TECHNOLOGIES

COHORT IDENTIFICATION

Conduct population risk stratification to identify specific cohorts that need to be monitored and reported on.

Monitor and focus efforts on populations that represent the greatest clinical and financial opportunity. View and target member populations based on single or multiple data points and export those cohorts to Cedar Gate's Care Management and Care Coordination applications, allowing care managers and care teams to act on the insights. Monitor the efficacy and ROI of health management programs and point solutions by tracking and reporting on performance indicators within a specified population.

DIY DASHBOARD & REPORT CREATION

Create custom reports and visualizations on the fly with an easy-to-use tool designed for the non-technical user.

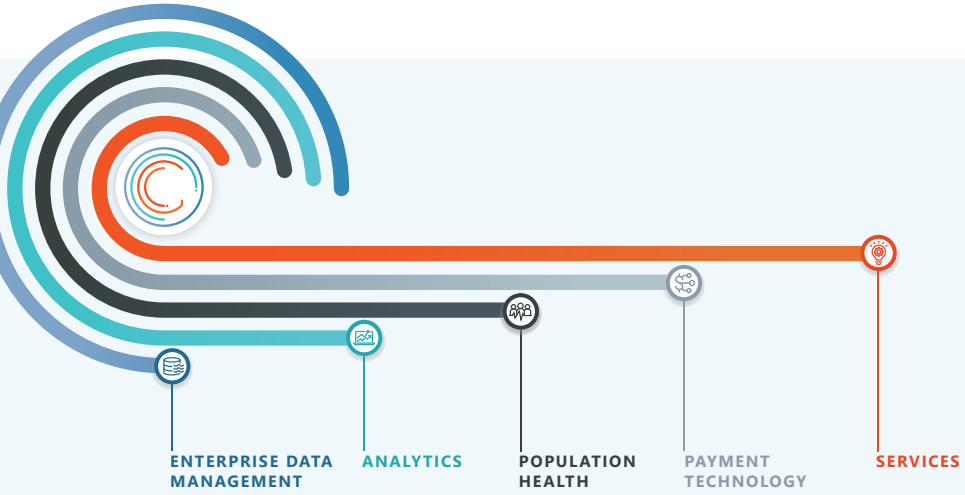

Reduce the cost associated with manual report building. Develop custom reports and dashboards with the Create Module, featuring a non-technical interface with a deep library of interactive tables, charts, and widgets that visualize the data and surface savings strategies. Drill down into any data point to view the contributing metrics, with the ability to go all the way to the underlying data table.

COST, QUALITY, TRENDS, & COMPARISONS

Monitor performance indicators and correct undesirable trends.

Pinpoint performance drivers and detractors. Measure and compare financial and clinical metrics to identify trends within a specified time period. Run real-time queries to compare health plan performance against benchmarks based on Cedar Gate's proprietary, de-identified and aggregated national member population data set.

CEDAR GATE TECHNOLOGIES

EXECUTIVE ANALYTICS

Automated, Focused Reports

Cedar Gate Executive Analytics provides configurable dashboards and a report distribution hub for payers, healthcare delivery organizations, and employers and their advisors wanting to give visibility into data, highlight trends, and automate report sharing with stakeholders. It presents easy to understand visuals that allow recipients to make data-driven decisions without getting lost in the analysis. It can generate user-specific views that ensure report consumers only access relevant information and insights. Executive Analytics is a module of Healthcare Benefits Analytics and Value-Based Care Analytics.

EXECUTIVE LEVEL ANALYSIS

Enable clients to conduct their own high-level analysis without being exposed to the potentially overwhelming underlying data tables.

Increase efficiency by enabling self-service report design and distribution. High-level analysis capabilities focus on priority insights, such as trends and comparisons for key performance indicators. It includes the ability to adjust reporting filters like date range, population, and paid vs. incurred claims.

RICH VISUALIZATIONS

Simplify client and stakeholder education by visually communicating complex concepts and insights.

Reduce the need to explain and justify analytic insights. Visualizations, charts, and interactive dashboards that summarize plan performance, including financial and utilization trends, and benchmark comparisons.

ROLE-BASED ACCESS

Control the level of access clients have to their data on a case-by-case basis.

Improve efficiency by configuring self-service access to automatically updating dashboards. Communicate only the key data and insights required by the spectrum of internal and external stakeholders, drawing attention to what matters, and minimizing information over-load.

TAILORED BRANDING

Tailor the look and feel of the reports.

Improve client experience and satisfaction, helping maintain a strong advisor/client/stakeholder relationship. Align dashboards with the look and feel of the client's brand, including logo, color scheme, and desired URL.

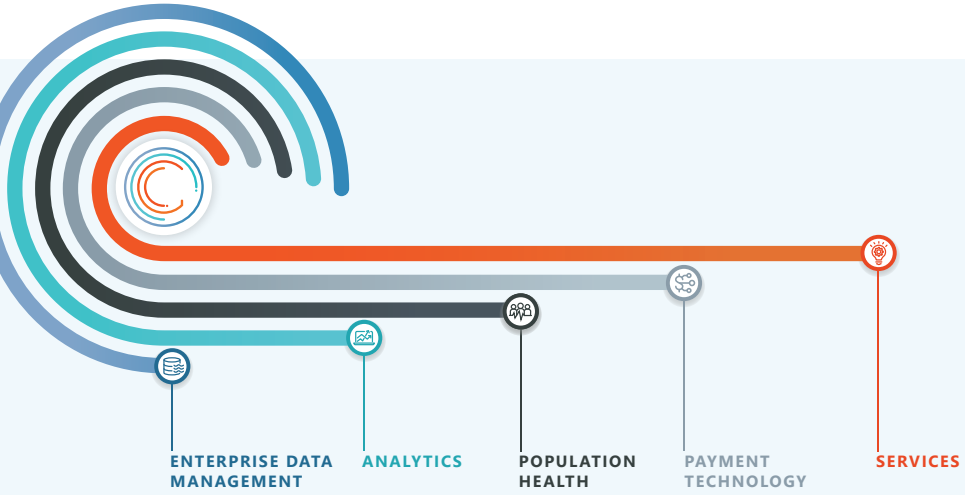

AUTOMATED REPORT DISTRIBUTION

Set a regular report distribution cadence for various users and across lines of business.

Reduce the time and cost associated with creating and distributing customer and user-specific dashboards. Create individualized reports for stakeholders within a client organization, as well as across lines of business, and set reports to automatically update and distribute at any interval.
